

TEJAS M

AI PRODUCT & PROGRAM MANAGER | GENAI PLATFORMS | AI- ASSISTED PROTOTYPING

Bengaluru, Karnataka | +91 9353397292 | tejas4302@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

AI Product/Program Manager leading enterprise GenAI and LLM-powered products end-to-end from discovery and AI-assisted prototyping through model/vendor evaluation, security governance, and production launch. Led delivery of enterprise AI initiatives at Bosch, including BGSW Goal Tracker and the Azure OpenAI-based Genie Finance platform, and currently leading discovery for ORBIT, a GenAI analytics platform exploring HR and Finance use cases. Uses LLM tools (ChatGPT, Claude, Emergent) directly as a product-development tool to prototype and validate user experiences before engineering investment, compressing time-to-first-prototype and de-risking scope early

CORE COMPETENCIES

AI Product Strategy • GenAI/LLM Platform Delivery • AI- Assisted Prototyping • Prompt & Model Evaluation • Requirements Engineering • AI Governance & Security • Agile & Scrum • Stakeholder Management • UAT & Release Management • Executive Reporting • Jira • Confluence • Powerpoint

AI TOOLS & PLATFORMS

ChatGPT • Claude • Emergent • Azure OpenAI • Microsoft Foundry • Replit • Bolt

SHIPPED AI PRODUCTS

BGSW Goal Tracker

- Led requirements discovery with HR through stakeholder interviews and authored the Lastenheft, translating quarterly goal-management needs into prioritized workflows and functional requirements.
- Built an AI-assisted prototype using ChatGPT, Claude, and Emergent to validate high-risk workflows with stakeholders before engineering investment and refine the production scope.
- Partnered with Enterprise Architecture and cross-functional teams to decompose requirements, estimate effort and dependencies, and translate the agreed scope into a phased roadmap, Jira backlog, and sprint plan through productionization.

Genie Finance - Enterprise AI Finance Platform

- Led requirements discovery with CTG (Controlling) stakeholders and authored the Lastenheft for an Azure OpenAI-based finance platform, translating business needs into prioritized functional and enterprise requirements.
- Partnered with Enterprise Architecture and development, cybersecurity, CSRO, and penetration-testing teams to break the solution into technical workstreams, identify dependencies, estimate implementation effort, and establish the delivery roadmap.
- Drove execution across Dev/QA/Prod, identity and security integration, security assessments, penetration testing, BIA/DR, UAT, and production readiness; recognized with the BGSW Shabash Excellence Award for the delivery.

ORBIT - Enterprise GenAI Analytics Platform

- Working with HR and Finance stakeholders to explore how GenAI- driven, conversational "vibe analytics" can let users interact with and derive insights from their own business data more intuitively.
- Focused discovery on identifying the highest- value HR and Finance use cases and clarifying data/user requirements, rather than defining a full enterprise build upfront - using those findings to shape initial scope and roadmap.
- Defining near- term success as validating that identified use cases solve meaningful user problems and establishing a clear, prioritized scope for the next phase; adoption, insight- generation efficiency, and user value to follow as measurable KPIs once the solution moves toward implementation.

EXPERIENCE

Senior Associate – Project Manager, Bosch Digital Organization (BDO)

Jul 2025 – Present

Bosch Global Software Technologies (BGSW), Bengaluru

- Lead enterprise AI and digital transformation programs from initiation through production release and operational handover, partnering across business, engineering, cloud, security, and enterprise architecture teams.

- Own governance, roadmap/sprint planning, executive reporting, and vendor management for a portfolio spanning shipped AI platforms and a new GenAI analytics initiative (ORBIT).
- Also led requirements gathering and governance framework design for BDO Docupedia (enterprise knowledge- management platform) and lead BDO's Business Continuity Planning (BIA, risk, and recovery planning).

TDS, Founder's Office

Jul 2023 – May 2025

Mu Sigma, Bengaluru

- Drove inbound and outbound sales across Chemical, Automotive, Oil & Gas and Energy vertical
- Led CRM transformation using HubSpot, Apollo IO and Zoho, improving sales pipeline visibility and data accuracy.

EDUCATION

B.E. – Automobile Engineering, New Horizon College of Engineering, Bengaluru | 2019 – 2023 | CGPA: 8.42

CERTIFICATIONS & RECOGNITION

- Generative AI for Project Managers - PMI & NASBA
- Product Innovation for Product Managers - LinkedIn Learning & PMI
- BGSW Shabash Excellence Award - Genie Finance (LedgerLM)
- BGSW Best Tyro Award - Best New Joiner
- Mu Sigma Spot Award - CRM transformation and AI- driven analytics
- Microsoft for Startups Founders Hub - Selected for the accelerator program
